## DOPE GOES WRONG AT MONCRIEF PARK

In Majority of Events Form Players Lose Their Money.

Jacksonville, Fla., January 21 .---Form players suffered at Monorief today, as the dope went wrong in the day, as the dope went wrong in the majority of the events. Mary F, was the only successful choice. Rain Thursday night caused a change in track conditions which evidently was responsible for the upset. T. M. Green, the medium of a heavy plunge at post time, won the feature event, beating such good ones as Sager and Nethermost. Summaries:

First race—five furlongs, breeders' race—Profit, 115 (McCarthy), 4 to 1, first; Colaustin, 104 (Davis), 20 to 1, second: Bertha E. 115 (Powers), 3 to 5, third. Time, 1:04.

Negotiations May End Here,
Washington, D. C., January 21.—Press telegrams from Tokio and St. Petersburg received this morning, to the effect that the proposal of the United States for the neutralization of the Manchurian railways had been rejected by both Japan and Russia, were read with great interest at the State Department.

Secretary Knox and Assistant Secretary Wilson were not at the department.

They had been called to the absence of retiring President Miles, of Blacksburg. No business was trans-acted except the election of officers, but the delegates had an informal dis-cussion of the football situation and cussion of the football situation and the outlook in athletics. Those present as delegates were: Rives Fleming, of Hampden-Sidney; F. L. Day, of Randolph-Macon: E. L. B. Goodwin, of William and Mary, and W. P. Dickey, of Richmond College. The Virginia Polytechnic Institute was not represented.

Capitol to explain certain estimates of appropriations recently sent to Congress.

Although the subordinate officials declined to comment on the information or to state whether or not the government had received confirmation of the report, there is good reason to believe that, from unefficial sources, the State Department, for some days has been in possession of the information that the action announced by Japan and Russia to-day might be looked for.

State Department Disappointed,

Russia to-day might be looked for,

State Department Disappointed.

There is no doubt that this result of
Secretary Knox's effort to eliminate
the Manchurian rallways from the
politics of the Far East, thus minimizing the danger of war, is a keen
disappointment to the officials.

Secretary Knox's plans, as announced in his original note to the
powers, clearly indicated the unselfish
and disinterested position of the
United States with respect to Manchuria, except to carrying into practical effect the doctrine of equal opportunity to which all the nations had portunity to which all the nations had subscribed.

portunity to which all the nations had subscribed.

Whether the matter will end with the action of Japan and Russia is problematical.

It is believed to be quite possible that with the rejection of the proposition to neutralize the railroads in Manchuria owned by Russia and Japan, the United States may turn is attention to the question of financing, in conjunction with Great Britain and other European nations, the construction of the proposed Chin Chowfu-Tsitshar Railroad.

Extension to Algun.
This proposed line, extends from Chin Chowfu in a north and north-esaterly direction to Tsitshar, on the esaterly direction to Tsitshar, on the Manchurian frontier. It is not improbable that an extension may also be built northeasterly to Algun, on the Amur River, which divides Manchuria from Russian territory.

This road will be about 400 miles in length to Tsitshar. If extended to the Amur its total length will approximate 600 miles. This road will tap the Russian Trans-Siberian road at Tsitshar.

Tsitshar.

This proposition formed a part of Secretary Knox's alternative neutralization plan. It seems probable that all the powers: including Russia and Japan, may signify willingness to co-

St. Petersburg, January 21.—Russia's reply to Secretary Knox's note, proposing the neutralization of the Manchurian railways, was delivered to Ambassador Rockhill to-day.

It has been understood generally that Japan and Russia would take identical action on the American proposal.

The Russian communication rejects the proposal for the neutralization of existing railroads,

It states also that the Russian government considers the alternative proposition for its participation in an international syndicate for the construction of the Chinchow-Aigun line acceptable in principle, but because of the political and strategical importance of the enterprise and its bearing on the East Chinese Railroad, Russia will defer a final answer on this subject pending the receipt of information as to the principles of the American project.
